Awareness Meditation

„Awareness is the ability to really be present in every moment of our daily life. Awareness is a type of energy that is at every person’s disposal. If we take care of it, it will be strong; if we do not cultivate it, it will fade. Awareness allows us to recognize what is happening in and around us at the present moment.“ (translated from German from the book „Schritte der Achtsamkeit, Thich Nath Hanh, Herder Publishing House)

Team Building – DIVERSION AND TEAM FUN

Sitting all day in a meeting room and dealing solely with specific topics is strenuous for all participants and, after a certain time, also tiring. Right after a meal or in the late afternoon one’s attentiveness strongly diminishes.

Therefore, some diversion and team fun can be good for you. Book one of our tried and tested team building activities and bring your participants back in swing within a short period of time. You will be coached by an experienced trainer.
